ASSEMBLY

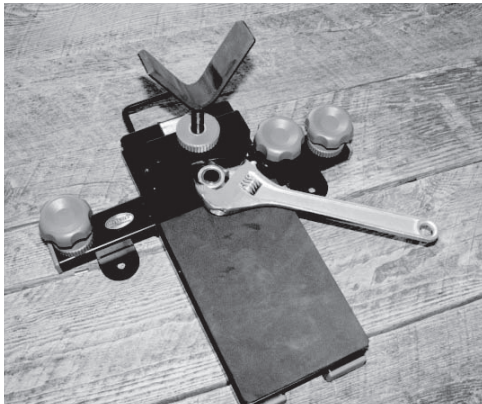

Screw threaded stem of the V notch into the bracket - the locking collar can be located either above (as shown) or below the bracket.

LOCK UP

Removing the lock-up knob allows the platform to rotate over 150° - Replacing the lock-up prevents the platform from rotating; providing a solid support.

To access the bearing, remove the large insert lock nut. To re-assemble, replace the nut. Tighten enough to remove all up & down play but still allow easy rotation.

Sometimes the bearing needs cleaning and lubrication. use an ammonia and hot water solution to clean. Air dry thoroughly (use a hair dryer). Lubricate with acid free machine oil - (sewing machine oil works well).
